About **Virtual**Signature-ID

Everything you need for fraud prevention, onboarding and compliance in a **single integrated platform.**

VirtualSignature-ID is a UK based SaaS provider, developing digital applications to meet the growing demand for verifiable eSignatures, workflow automation and ID verification across all sectors.

We have worked closely with our legal, accountancy and local government colleagues amongst others, to develop solutions that securely enable the remote onboarding of clients and secure exchange of documents.

Our web and mobile applications allow end users to quickly complete and sign documents as well as undertake AML and KYC checks remotely.

Pioneering **Regulated Technology** for Professionals

Qualify and witness
eSignatures online in minutes.

VirtualSignature-ID provides real-time eSignature, identity verification and a document exchange platform that integrates with your existing case, document, practice management, and CRM systems.

This provides you, your clients and third party intermediaries with a secure and seamless digital onboarding experience.

The 'All-In-One' **Smart Onboarding** Platform

It's no longer necessary to use different providers for each step of the onboarding journey. We have everything you require under one roof, meaning you can pick and choose the most suitable tools for your needs.

Use the **apps you want**, whenever you want.

SmartSign

SmartForms

SmartCheck

SmartPay

SmartLink

SmartConnect

SmartSign

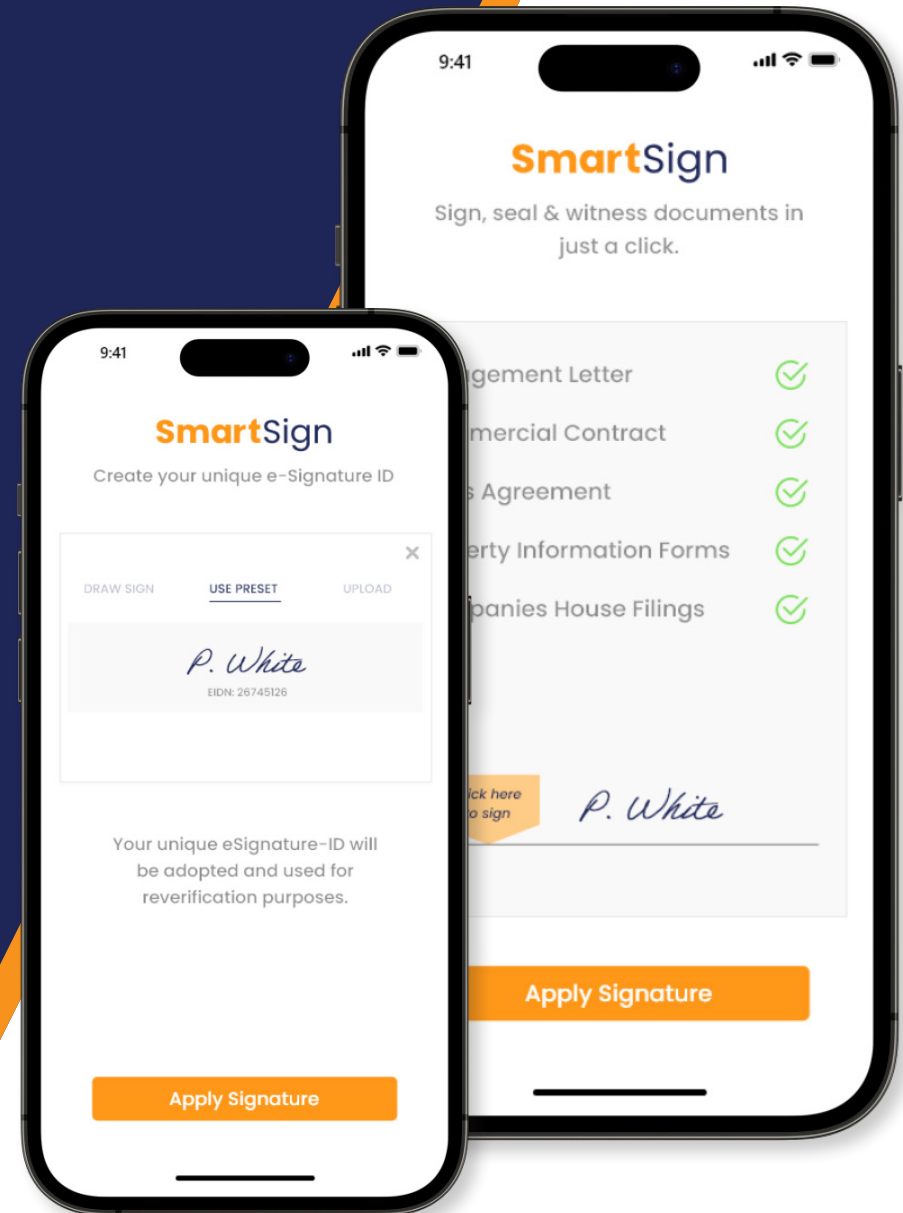

Be **confident** of who's behind the signature

With our range of **Standard**, **Advanced** and **Qualified** eSignatures you can simply select the level of authentication needed based upon your compliance and 'risk' reduction requirements.

Add Smart tags to your documents and create your own eSignature fields. Customise your signing sequences.

eWitness documents and deeds and add digital seals.

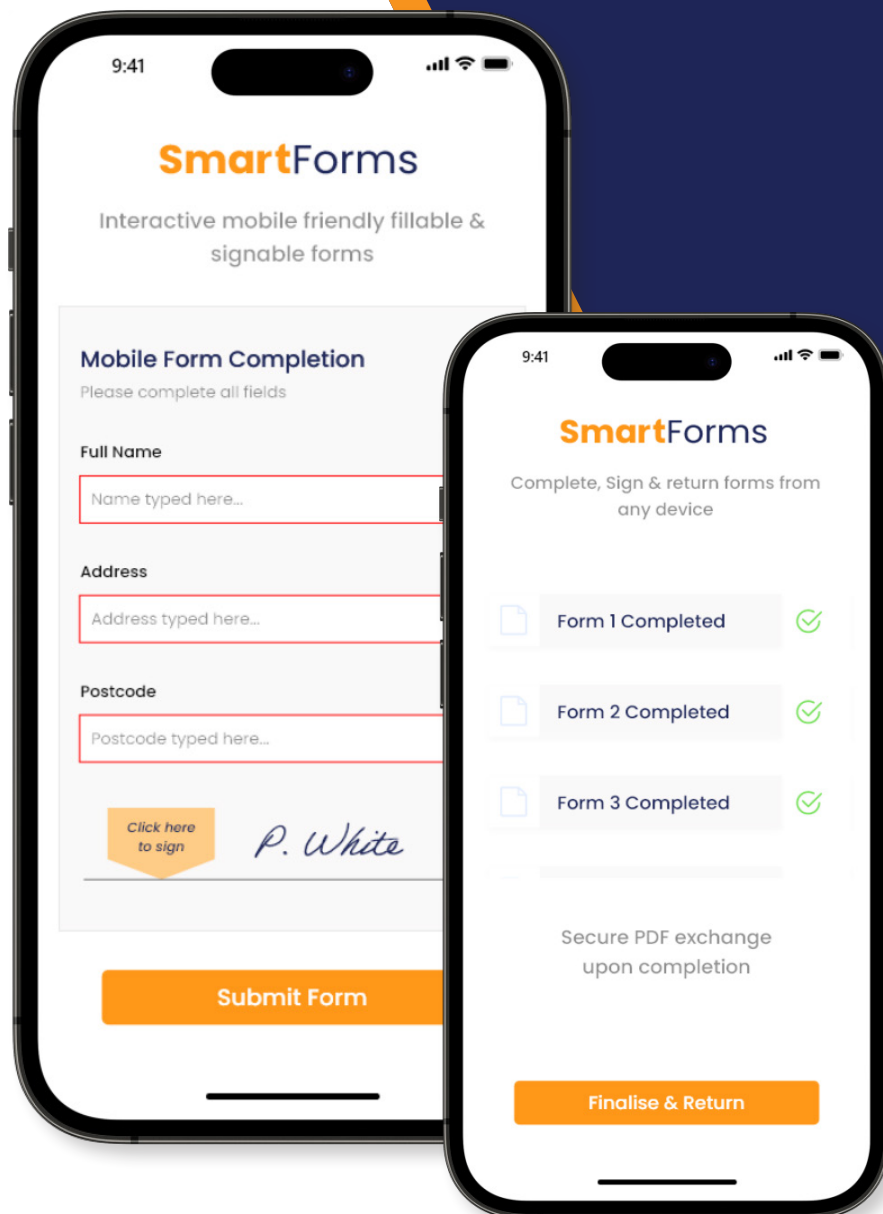

Sending large files? No problem, our platform can handle bulk mail. Link and share with third party organisations.

Virtual

SmartForms

Make your Word and PDF forms dynamic and **mobile friendly**

Streamline your workflows. Increase client uptake by giving them the ability to complete, sign and return forms on their smart phone quickly and easily. Transfer the completed information directly to your document management system. Create your own and use a personalised **SmartForms** library.

It is quick and easy to make your Word and PDF forms dynamic and mobile friendly with our intuitive user interface.

With **SmartForms**, Word and PDF forms are easier for you and your clients.

Virtual

SmartCheck

Know who your client is and verify them with **100% accuracy**

NFC chip reading from any Smart phone coupled with geo-location, 3D video liveness, anti-tamper and anti-spoof technology gives the assurances you need to make those important AML and KYC decisions. Give your clients added comfort with your corporate branded app that's easy to use and delivers an immediate result.

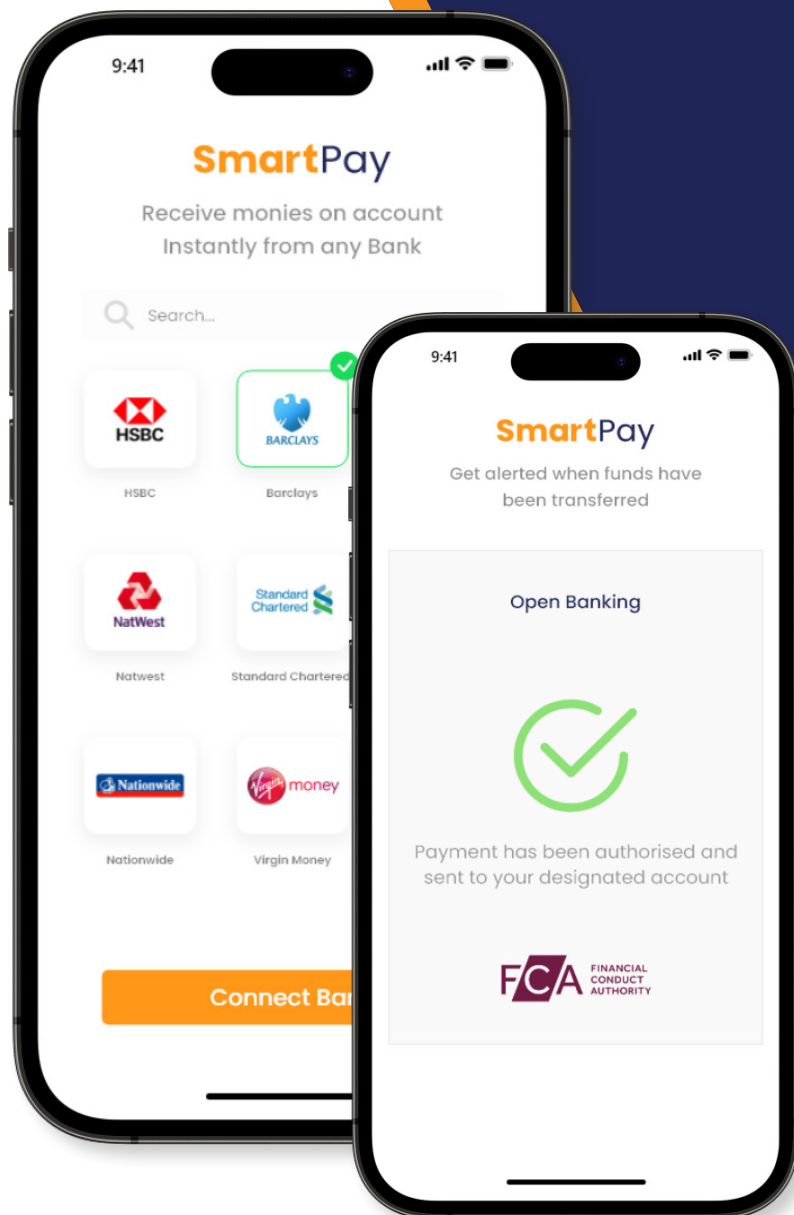

International clients? Our PEPs and Sanctions check is configured to check overseas databases.

Source of funds checks? **SmartCheck** has it covered – securely and reliably. Detailed reporting delivers copies of bank statements and proof of funds audit.

SmartPay

Collect **payments on account** more securely and efficiently

The secure way for your clients to pay funds directly into your bank account. The application allows your client to authorise the use of Open Banking, meaning they can make a payment without leaving the platform. The transactions are audited and receipted.

SmartPay simplifies your processes and enables a seamless workflow, while clients benefit from unrivalled ease and convenience.

SmartConnect

SmartConnect is the key to seamless workflow automation

This is because it's how our RESTful API connects to a multitude of case, practice, document management and CRM solutions, like Advanced P4W, Proclaim, Intapp, VisualFiles, iManage, ActionStep, MS Dynamics, Cloudify and SalesForce.

It saves you time – and expensive software development costs by simply enhancing your existing process, rather than changing it altogether.

SmartMail

Encrypted **document exchange** with proof of delivery

Add an **extra** layer of **security** into your emails and prove receipt by using our **SmartMail** feature.

Think of it as a digital Special delivery. Emails are encrypted and an audit trail generated along with proof of delivery.

Industry Grade **Security** and **Governance Standards**

Security, resilience, reliability and scalability are very important to us and our customers and that's why we partner with leading industry cloud and data providers.

Cyber security and fraud prevention are paramount to our customers, which is why we are fully GDPR compliant, follow ISO27001 standards and are Cyber Essentials Plus accredited.

We are an accredited ID Service Provider (IDSP) appearing on the gov.uk website, having undergone a very stringent audit process to meet the requirements of the UK Digital Identity and Attributes Trust Framework.
